

Document Assembly Module

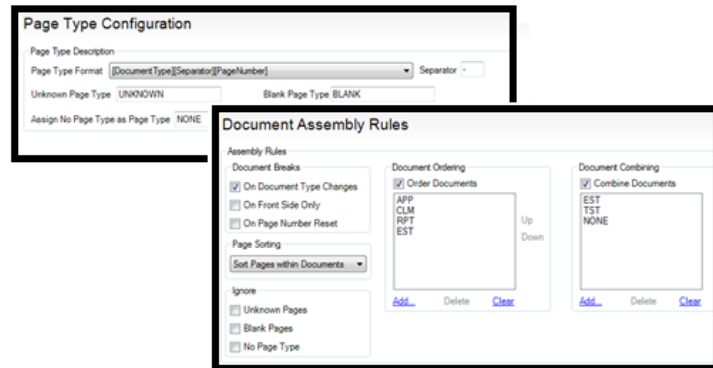

for EMC-Captiva

An unattended module which organizes pages into documents, sorts pages and documents and combines document.

Key Features

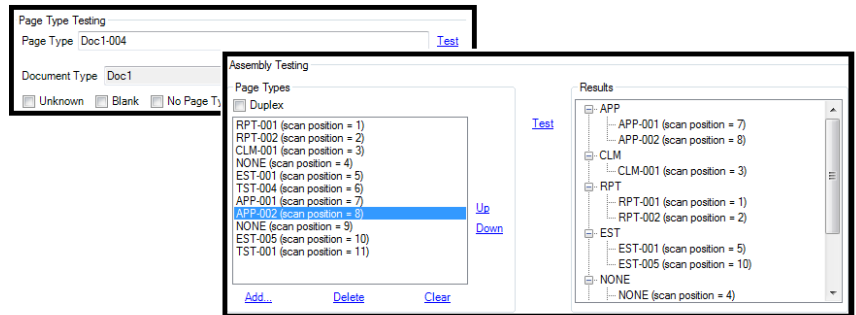

- User Friendly Graphical Configuration of Assembly Rules
- Testing of Assembly Rules during configuration
- No Complex splitting logic in Capture Flow or Custom Scripting

Overview

Module setup provides graphical configuration of page type and document assembly rules eliminating complex logic from the Capture Flow and reducing custom Modules and Scripts

Testing Mode during Module Set up allows the results of Page Type Parsing and Document Assembly to be viewed, saving time of running and rerunning batches to tune the configuration options.
